QUESTION (

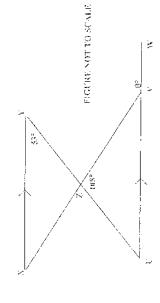

Use a SEPARATE mitting sheer.

Marks

(a) Find the other of $\frac{\sqrt{12.35 \cdot 8.66}}{6.5}$ correct to two decimal places

(b) Salve the variation $\frac{x+6}{3} = \frac{4}{3}$

7

The diagram shows XY parallel to DW, ZXYU = Ω^4 , ZUZV = 108° and ZXVW = 0°

Bind the value of B. Give ronsons.

- (G) Find a primitive function for x = 4.
- A function go so defined est $S(x) = \begin{cases} 2x + 1 \text{ when } x \in \mathbb{Z} \\ S(x) = \begin{cases} x + 1 \text{ when } x \in \mathbb{Z} \end{cases} \end{cases}$

Valuate of 🕒 🗝 🕾 🖺

, 6 Graph the souther of Exist 2 > 2 on the miniber ine.

QUESTION 2 Usw a SEPARATE writing sheer.

Marks

The diagram shows ΔABC with vertices $A(-1,-2),\,B(0.3)$ and C(5.4).

Copy the diagram onto your answer sheet.

- (a) E is the midpoint of AC. Show that the coordinates of E are (2,1).
- (b) Show that the gradient of AC is !.
- (a) A line L is drawn through B, perpendicular to AC. Show the equation of line L is $p=3-\epsilon$.
- (d) Show that E lies on line L.
- (e) On your diagram, draw line L and plot point E. Prove ABEC is congruent to $\Delta \Delta E A$.
- (f) AC is a diameter of a circle.
- (i) Calculate the radius of the circle.
- (ii) Hence find the equation of the circle.

QUESTION 4 Use a SEPARALE writing sneet.	(a) The third term and the tenth term of an arithmetic series are
	Marks

	OUESTION 3

- (a) Differentiate the following expressions with respect to x:
- 6
- 3x cos 2x Ξ
- \equiv
- Evaluate the following definite integrals: <u>(e)</u>

(i)
$$\int_{0}^{\pi/2} \sin 3x \, dx$$

$$(ii) = \int_{\mathbb{R}} e^{2\pi i t} ds$$

(c) Find
$$\int_{-1}^{\infty} \frac{x}{1+\frac{1}{2}} dx$$

Marks

- 7 and 42 The third term and the respectively. Find the: 3
- first term and the common difference.
- sum of the first ten terms of the series. \equiv
- A box contains five blue, three yellow and eight red heads. Two heads are selected at rendom from the box without replacement. Find the probability that: 6

m

- both beads are bine. 9
- at most one of the beads is blue. Ē

FIGURE NOT TO SCALE

The Clagram shows the graph of the partition $y=9-x^2$. A tangent is trawn to the parabola at the point (4.3).

- Show that the equation of the tangent at (1.3) is 2x + y = 10.
- Explain how you know the tangent crosses and a axis at (5.0). :::
- Calendate the area bounded by the parabola, the tangent and the 0

FIGURE NOT TO SCALE

In the diagram, AB \pm 9.3 cm, BC = 7.4 cm, \angle BCD = 61°19', \angle BDA \pm 103°16' and \angle BAD = 41°29'.

Find the length of BD correct to the nearest mm.

3

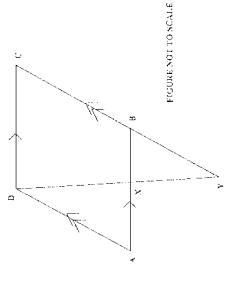

- (ii) Calculate the area of AABC correct to the nearest on?
- (b) Consider the curve $y = 4x^3 + 6x^2$.
- (i) Find the coordinates of any turning points and determine their nature.
- (ii) Find the x coordinate of any points of unflexion.
- (iii) Sketch the curve for the domain $-2 \le x \le 1$.
- (iv) What is the maximum value of $4x^2 + 6x^2$ in the domain $-2 \le x \le 1$?

QUESTION 6 Use a SEP.1RATE writing sheet

Marks

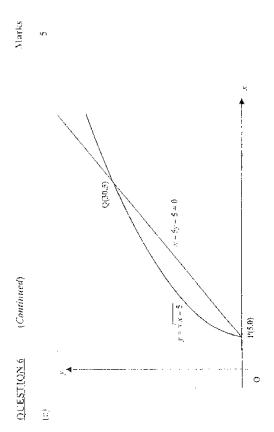

(a) Find all the values of x for which $\ln x = 2 \ln x$

(<u>a</u>)

In the diagram, ABCD is a parallelogram, |X| is a point on AB. DX and CB are both produced to $Y_{\rm c}$

- (i) Copy this diagram onto your enswer sheet.
- (ii) Prove that GADX is similar to ACYD
- (iii) Hence find the length of XY given AX = 8 cm, DC = 12 cm and DX = 10 cm.

o Shaure the meaning of the curve of the country of a

FIGURE NOT TO SCALE

The diagram shows the graphs of the curve $y = \sqrt{x-5}$ and the line x = 5y = 5 = 0. The curve and the line intersect at the points P(5.0) and Q(30,5). The region bounded by the curve and the line is rotated about the y-axis. Find the volume of the solid generated.

OUESTION 1 Use a SEPARATE writing sheet

Marks

ur,

(a) An experimental vaccine was injected into a car. The amount, M millitures, of vaccine present in the bloodsmean of the car, ϵ hours later was given by $M=e^{-2r+3}$.

- (i) How much vaccine was initially injected into the car?
- (ii) At what rate was the amount of voccine decreasing at the end of β hours?
- (iii) Show that there will always be more toan 3 millifitues of vaccine present in the car's bloodstream.
- (iv) Sketch the curve of M + e^{-2t} + 3 to show how the amount of veccine present in the cat's blowlateam changes over time.

 (b) A particle moves in a straight line. At time t seconds, its displacement, it metres from a fixed point O on the line is given by

۲--

 $x = 1 - \cos \pi t$

- (i) What is the initial displacement of the particle?
- (ii) Sketch the graph of x as a function of a
- (iii) Find an expression for the velocity of the particle at any time t.
- (iv) What is the velocity of the particle at time $t = \frac{1}{6}$
- (v) At what time does the particle figal reach its maximum speed?

Use a SEPARATE writing sheet OUESTION 8 When Jack left school, he borrowed \$15,000 to buy his first can. The interest rate on the loan was 18% p.a. and fack planned to pay hack the loan in $60\,$ equal monthly instaiments of SM. ē

Show that immediately after making his first monthly instalment, Jack owed =

Show that immediately after making his third monthly instalment, Jack owed . . .

$$S(15.000 \times 1.015)^3 + MO1 + 1.015 + 1.015^2)$$

Calculate the value of M.

Œ

The table shows the values of a function f(x) for five x values. <u>-6</u>

C GENERAL STORE FIGURE NOT TO SCALE c kin Ξ

The water's adge is a straight line ABC which tuns East-West. A lighthbase is 6 km due north of A. 10 km due east of A is the general stere. To get to the general store as quickly as possible, the lighthbase keeper raws to a point B, x km from A, and then jugs to the general store. The lighthurse keeper's rowing speed is 6 knuh and his jugging speed is 10 kinsh.

Show that it takes the figuritodisk scape: $\frac{\sqrt{2}6 \pm x^4}{\hbar}$ bours to row iton. the lightnouse to B. ÷

Show that the total time taken for the lighthouse keeper to reach the general store is given by: Ē

Honce show that when $x \in 40$ km, the time it takes for the figurificates keeper to that at from the aghthouse to the general stoce is a minimum. -

Hence find the culickest time it takes the lighthouse keeper to go to the general sond from the lightnouse. Give your answer correct to the nemest mainte. 3

Marks

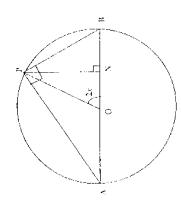

FIGURE NOT TO SCALE

The diagram shows a circle with centre O and diameter ΔB . P is a point on the circumference of the circle. PN is drawn perpendicular to ΔB and ΔP is perpendicular to PB. Let $\angle POB = 2\pi$.

- Explain why AAPO is isosceles. \in
- Explain why $\angle OAP = \angle OPA = x$ \equiv
- Show that $\sin 2x = \frac{2PN}{AB}$ Ē
- (iv) Use $\triangle APN$ and $\triangle PAB$ to show that 2 sin x cos x = sin 2x
- Kelfie and Lachlan play a game where they each take turns at throwing two ordinary diec. The winner is the first person to throw a double. Kelfie throws first, 9

w.

- Show that the probability that Lachlan wins the game on his first throw \in
- Show that the probability Lacidan wins the game on his first or second throw is given by $\frac{5}{36} \pm \frac{5}{67}$ \equiv
- Calculate the probability that Luchton wins the gaine. Ē
