TRIAL HIGHER SCHOOL CERTIFICATE EXAMINATION

2000

MATHEMATICS

3 UNIT (ADDITIONAL) AND 3/4 UNIT (COMMON)

Time Allowed - Two hours (Plus 5 minutes reading time)

DIRECTIONS TO CANDIDATES

- Attempt ALL questions.
- ALL questions are of equal value.
- Write your Student Name / Number on every page of the question paper and your answer sheets.
- All necessary working should be shown in every question. Marks may be deducted for careless or badly arranged work.
- Standard integrals are supplied.
- Board approved calculators may be used.
- The answers to the seven questions are to be handed in separately, clearly marked Question 1, Question 2 etc.
- This question paper must not be removed from the examination room.

Question 1 (Start a new page)

Marks

a. Show that the exact value of $\cos 15^{\circ}$ is $\frac{\sqrt{3} + 1}{2\sqrt{2}}$

2

b. For what values of $x (x \neq 0)$ does the geometric series

- $1 + \frac{2x}{x+1} + \left(\frac{2x}{x+1}\right)^2 + \dots$ have a limiting sum?
- c. Use the table of standard integrals to find $\int_0^4 \frac{1}{\sqrt{9 + x^2}} dx$

2

- d. Six men and five women are arranged at random in a row so that each woman is between two men.
- 4

- i. How many such arrangements are possible?
- ii. What is the probability that two specified men, A and B, sit at the ends of the row?

Question 2 (Start a new page)

a. From a cliff 100 metres high, the straight line distance to the horizon is 36 kilometres.

00 m 36 km

Calculate the radius of the earth.

3

3

- b. A spherical bubble is expanding so that its volume is increasing at a constant rate of 50 mm³ per second.
 - What is the rate of increase of its surface area when the radius is 8 mm?
- c. Show that $tan^{-1}\left(\frac{1}{4}\right) + tan^{-1}\left(\frac{3}{5}\right) = \frac{\pi}{4}$

- 2
- d. In the expansion of $(\sqrt[5]{x} + \sqrt[3]{x})^9$, find the term(s) where the power of x is an integer.

2

4

Question 3 (Start a new page)

Marks

a. i. Show that $\frac{\sec^2 x}{\tan x} = \frac{1}{\sin x \cos x}$

4

- ii. Use the substitution $u = \tan x$ to show that $\int_{\frac{\pi}{6}}^{\frac{\pi}{3}} \frac{dx}{\sin x \cos x} = \log_e 3$
- b. The point P(2ap, ap²) lies on the parabola defined by $x^2 = 4ay$.

4

The line PM is drawn parallel to the axis of the parabola to meet the directrix in M. S is the focus of the parabola.

i. State why SP is equal to PM.

- ii. The tangent at P meets the y-axis at D. Find the coordinates of D.
- iii. Show that SPMD is a rhombus.

4

c. Use the Principle of Mathematical Induction to prove that, for all positive integers, n,

$$\sum_{r=1}^{n} \frac{1}{(4r-3)(4r+1)} = \frac{n}{4n+1}$$

Question 4 (Start a new page)

a. The point C(-6, 1) divides the interval AB externally in the ration 3:1. If A has coordinates (0, 4), find the coordinates of B

2

4

- b. i. Express $4\sin\theta 3\cos\theta$ in the form $A\sin(\theta \alpha)$, A > 0, $0 < \alpha < 90^{\circ}$
 - ii. Find all solutions of $4\sin\theta 3\cos\theta = 1$ for $0 \le \theta \le 360^{\circ}$

Question 4 is continued on the next page.

Question 4 (continued)

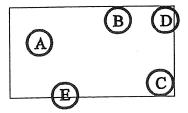

Marks

2

c. At the Easter Show, there is a new game in which a small hoop of radius 100 mm is to be thrown onto a rectangular table 3 metres by 2 metres. If the hoop lands so that no part of it extends past the edge of the table, a prize is won. If part of the hoop extends over the edge of the table, no prize is won. (In the diagram, hoops A, B and C would win prizes but hoops D and E would not)

ize

Assuming that the hoop lands on the table, what is the probability of winning a prize with one throw?

d. The quadratic equation $x^2 + 6x + c = 0$ has two real roots. These roots have opposite signs and differ by 2n, where $n \neq 0$.

4

i. Show that $n^2 = 9 - c$

ii. Find the set of all possible values of n.

Question 5 (Start a new page)

a. A factory machining car parts finds that 98% are machined correctly. From a sample of 40 car parts, calculate to 3 decimal places the probability that

4

i. exactly 38 of the parts are correctly machined.

ii. less than three parts are incorrectly machined.

b. i. Show that the equation $\log_e x + x^2 - 4x = 0$ has a root between x = 3 and x = 4.

4

ii. Using x = 3.5 as a first approximation, find a better approximation using Newton's method once.

c. i. Show that $\cos 4x = 8(\cos^4 x - \cos^2 x) + 1$

4

ii. Hence or otherwise solve $\cos^2 x - \cos^4 x = \frac{1}{16}$, $0 \le x \le \frac{\pi}{2}$

Question 6 (Start a new page)

Marks

a. An F18 jet is climbing at a speed of 504 kilometres per hour at an angle of 30° to the horizontal. When the jet is 600 metres above the ocean, it drops a flare from a wing. The only force acting on the flare is gravity.

5

Take $g = 10 \text{ ms}^{-2}$.

- i. Find the time taken for the flare to hit the ocean.
- ii. Calculate the maximum height reached by the flare.
- iii. What is the horizontal distance travelled by the flare?
- b. The velocity, $v \text{ ms}^{-1}$, of a particle moving in Simple Harmonic Motion along the x-axis is given by the expression

7

$$v^2 = 28 + 24x - 4x^2$$

- i. Between what two points is the particle oscillating?
- ii. What is the amplitude of the motion?
- iii. Find the acceleration of the particle in terms of x.
- iv. Find the period of the oscillation.
- v. If the particle starts from the point furthest to the right, draw a graph of the displacement of the particle against time over two complete periods.

Student Name / Number

Question 7 (Start a new page)

Marks

a. The arc of the curve $y = \frac{1}{2}(1 + \sin x)$ between $x = -\frac{\pi}{2}$ and $x = \frac{\pi}{2}$ is rotated about the x-axis.

4

Find the volume of the solid formed.

b. i. Use the substitution $u = \cos x$ to evaluate $\int_0^{\frac{\pi}{2}} \sin^5 x \, dx$, leaving your answer as a fraction.

ii. Given $y = \sin^{2n-1} x \cos x$, where *n* is a positive integer, find an expression for $\frac{dy}{dx}$ in terms of powers of $\sin x$

- iii. Hence show that $\int_0^{\frac{\pi}{2}} \sin^{2n} x \, dx = \frac{2n-1}{2n} \int_0^{\frac{\pi}{2}} \sin^{2n-2} x \, dx$, where n is a positive integer.
- iv. Evaluate $\int_0^{\frac{\pi}{2}} \sin^6 x \, dx$ in terms of π
