SCEGGS Darlinghurst

2004 Higher School Certificate Trial Examination

Mathematics Extension 1

This is a TRIAL PAPER only and does not necessarily reflect the content or format of the Higher School Certificate Examination for this subject.

General Instructions

- Reading time 5 minutes
 - Working time 2 hours
- Write using black or blue pen
- Board-approved calculators may be used
- A table of standard integrals is provided at the back of this
- All necessary working should be shown in every question

Total marks – 84

- Attempt Questions 1–7
- All questions are of equal value

BLANK PAGE

All questions are of equal value Attempt Questions 1-7 Total marks - 84

Answer each question on a NEW page

Question 1 (12 marks)

Marks

Solve for x: æ

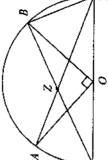

$$\frac{3}{x-2} \le 1$$

- Find, to the nearest minute, the acute angle between the lines y = 4x + 5and 3x + 2y - 1 = 0. 3
- sin 4x 8x 0 1 × lim Find છ
- (d) Evaluate $\int_{-3}^{3} \sin^2 3x \ dx$
- Evaluate $\int_{0}^{\infty} x (1-x)^{7} dx$ using the substitution u=1-x. <u>e</u>

Question 2 (12 marks) START A NEW PAGE

Marks

- Differentiate $x^2 \sin^{-1} 3x$ with respect to x. æ
- How many different arrangements of the letters of the word PARABOLA are possible? 3
- Find all real values of a for which $P(x) = ax^3 8x^3 9$ is divisible by x a. 9
- The two curves $y = \cos^{-1} x$ and $y = 2 \tan^{-1} (1 x)$ both cut the y-axis at the point $\left(0, \frac{\pi}{2}\right)$. Both curves also share a common tangent at $\left(0, \frac{\pi}{2}\right)$. Find the equation of this tangent. €
- છ

Not to scale

O is the centre of a semicircle, diameter XY.

OA and OB are perpendicular, AY and XB intersect at Z.

Copy the diagram onto your answer sheet.

- (i) Explain why $\angle AYB = 45^{\circ}$.
- (ii) Prove that BY = BZ

Question 3 (12 marks) START A NEW PAGE

Express $\sqrt{3}\cos x - \sin x$ in the form $R\cos(x + \alpha)$ where R > 0 and $0 < \alpha < \frac{\pi}{2}$. Ξ **e**

(ii) Hence, sketch the graph of the equation $y = \sqrt{3} \cos x - \sin x$ for

$$\frac{-\pi}{6} < x < 2\pi .$$

(iii) Solve the equation $\sqrt{3}\cos x - \sin x = \sqrt{2}$ for $0 \le x \le 2\pi$.

 (b) 'On a particularly windy day, a sock pegged on a clothes line is oscillating in simple harmonic motion such that its displacement, x centimetres, from the origin, O, is given by the equation:

x = -16x where t is the time in seconds.

Show that $x = a\cos(4t + a)$, where a and α are constants, is a solution of motion for the sock, Ξ

(ii) Initially, the sock is 5cm to the right of the origin with a velocity of -4cms⁻¹. Show that the amplitude of the oscillation is $\sqrt{26}$ cm.

(iii) Find the maximum speed of the sock.

Prove that 5'' + 11 is divisible by 4 for all integers $n \ge 0$, by mathematical

Question 4 (12 marks) START A NEW PAGE

Marks

Marks

Consider the function $f(x) = \pi + 2\sin^{-1}\left(\frac{x}{3}\right)$ <u>a</u>

State the domain and range of y = f(x). Θ

Sketch the graph of y = f(x), marking clearly any endpoints. Ξ

Two roots of the equation $x^3 + px^2 + q = 0$ (p, q real) are reciprocals of each other. æ

Show that the third root is equal to -q. Ξ

Show that $p = q - \frac{1}{q}$ \equiv

A forklift is driving down a warehouse aisle. The acceleration of the forklift is given by the equation: 3

$$x = -\frac{1}{2} \mu^2 e^{-x}$$

where x is the displacement from the origin and μ is the initial velocity at the origin.

Show that $v^2 = 4e^{-x}$ if $\mu = 2ms^{-1}$.

(ii) Explain why v > 0.

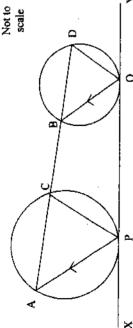

(iii) Find an equation for x in terms of t.

(iv) Describe the motion of the particle as $t \to \infty$.

pede 4

Marks

Ē

AD is a straight line, cutting one circle at A and C and the other circle at B and D. AP is a chord in one circle and BQ, a chord in the other circle, is parallel to AP. In the diagram, XY is a common tangent to two non-intersecting circles. This tangent touches one circle at P and the other circle at Q.

Copy the diagram onto your answer sheet.

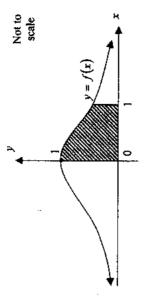

Prove that:

- (i) PC || QD.
- (ii) PQBC is a cyclic quadrilateral.
- The equation of the tangent to the parabola $y = x^2$ at the point $P(t, t^2)$ is $y=2tx-t^2.$ 3
- Show that the line passing through the focus of the parabola, perpendicular to this tangent, has equation $y = \frac{t - 2x}{1 - 2x}$ \equiv
- Show that the foot of the perpendicular from the focus to the tangent is the point $F\left(\frac{t}{2},0\right)$ Ξ
- (iii) Find the locus of M, the midpoint of PF.

Question 6 (12 marks) START A NEW PAGE

Marks

- A crew of four rowers is to be chosen from five boys and six girls. How many different crews are possible if: **B**
- there are no restrictions? Ξ
- (ii) the shortest girl and the tallest boy must be included?
- 1 + x = Consider the graph of the function f(x) = -Đ

- Find the area bounded by this curve, the x axis and the two ordinates x = 0 and x = 1 using Simpson' Rule with three function values. Answer correct to 4 decimal places. Θ
- Find the exact value of the area bounded by y = f(x), the x-axis and the two ordinates x = 0 and x = 1. Ξ
- (iii) Hence find an approximation for π correct to 2 decimal places.
- Surveyors have marked out two points, A and B, in St Peter's St. The points are 52m apart and B is due east of A. ত

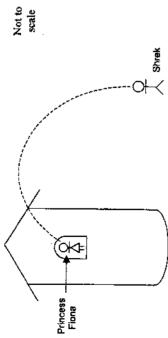

110° T respectively. The angles of elevation of the tallest point of the Great Hall The bearings of A and B from the tallest point of the Great Hall are 230°T and from A and B are 30° and 60° respectively.

Show that the tallest point of the Great Hall is $4\sqrt{39}$ m high.

page 6

Higher School Certificate Trial Examination, 2004 Mathematics Extension 1

- Find all the values of θ for which $\cos^2 \theta + \frac{\sqrt{3}}{2} \sin 2\theta = 0$. **(**8)
- 3

Princess Fiona is locked up in a tower, 80m above the ground. To gain the attention of Shrek, Princess Fiona throws a lentil at an angle of elevation of θ and an initial velocity of 50ms1.

- Derive the equations for the horizontal and vertical displacements of the lentil t seconds after it is thrown. (Use $g \approx 10 \text{ms}^{-2}$.) Ξ
- Shrek is 300m from the base of the tower when he is hit by the lentil. Find the values of the initial angle of projection, θ , correct to the nearest degree, if Shrek is 2m tall. \equiv
